Professional Summary

Innovative and result-driven software engineer with 5+ years of experience in developing high-quality software solutions with deep understanding of UI/UX. Proficient in full-stack development, cloud computing, and agile methodologies. Adept at problem-solving and optimizing software performance.

Senior Software Engineer

Senior Software Engineer, *Tezda Ltd*

03/2024 – Present

London, UK

Tezda (pingtop), a London-based startup, is dedicated for transforming the e-commerce landscape with their innovative and immersive solutions. I was responsible for the short video editing part of the application, and I was also recently involved in the video calling part using WEBRTC technology. Also participated on instant messaging with creating voice note functionality and design.

- Managing video editing implementation and video calling part with creating scalable mobile application using Flutter and dart.
- Collaborated with cross-functional teams to define project requirements and deliver software solutions.
- Improved application performance by 30% through code optimization and refactoring.
- Designed and implemented integration with RESTful APIs using GraphQL

Software Engineer, *Omdurman Maternity Hospital*

10/2022 – 04/2023

Omdurman, Khartoum

- Led team of 5 front-end and back-end developers to create and enhance performance of app functionality regarding to project's sensitivity.
- Developed and maintained medical-record application using Flutter and Laravel.
- Implemented automated testing procedures, reducing bugs by 20%.

Software Engineer, *Soat Inc.*

06/2021 – 10/2022

Riyadh, KSA

- Developed and maintained delivery application using Flutter for front-end and back-end Node.js and Laravel.
- Implemented real-time geo location and handled load balancing on server-side.
- Applied Algorithms on admin dashboard to consider priority of management's modifications.

Software Engineer, *Amipharma Inc.*

01/2019 – 05/2021

Khartoum-Bahri, Sudan

- Developed and maintained e-commerce application using Flutter for front-end and back-end Ruby on Rails.
